Forward and Disclaimer

These are math notes made by a student (with a physics major and math minor) based off text books. It may contain misconceptions and misinterpretations, thus should not be viewed in the same light of a text book. Use at your own risk and mental sanity.

Book Constitution

Intents and Purpose

The goal of this book is to organize mathematical knowledge of topics related to the study of physics or the author's interest. It is meant to be used as a source of for future reference, not as a textbook for students new to the topics. It is a notebook of a student, thus should be treated as one and not as a textbook. At most, it could be used as a study guide along side a textbook. Definitely not as the main source for acquiring knowledge.

Layout and Organization

The book is split into parts each containing a field of study mathematics, or a topic large enough to justify giving it its own part. Each part contains chapters that focuses on a particular topic required to understand the field, with sections dedicated to describing a particular knowledge required for the topic.

As axioms, definitions, theorems, corollary, and proofs are integral and abundant to the study of mathematics, each will have a unique style. Each environment and its styles are displayed as follows:

Axiom 0.1 Axiom name

Example Axiom Axioms are the "ground rules" of the set.

Theorem 0.0.1 Theorem name or citation

Example Theorem An important logical result from the axioms, with proof.

Conjecture 0.0.1 Name of conjecture or citation

Example Conjecture A hypothesis, without proof.

Corollary 0.0.1.1. *Example Corollary An implication as a result of a theorem.*

Lemma 0.0.1.1. *Example Lemma Small theorems that build up to a larger theorem.*

Proof: Logical deductions that results in a theorem. Proofs I've written are in grey. □

Definition 0.1 Word

Example Definition The definition of a word.

Example 0.1.1. *An example.*

Remark. *Remark A comment by the author in the textbooks used.*

Observation. *Example Observation A remark by me.*

Question. *Example Question A question from me for a mystery to be answered later.*
